1. Claims 8,9 and 12 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected group, there being no allowable generic or linking claim. Election was made without traverse in the reply filed on 05 April 05.

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1,2 and 4 are rejected under 35 U.S.C. 102(b) as being anticipated by Bleam '727, who shows a meat bandsaw with all of the recited limitations including a manifold (e.g. 13, etc.), a pair of nozzles (21) and a support wall (just to right of nozzles in figure 3).

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 1-7,10 and 11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bleam, who shows a meat bandsaw with most of the recited limitations except for a second pair of nozzles on the upwardly moving section of the band saw. Examiner takes Official Notice that it is old and well known to employ a second blade cleaning

Art Unit: 3724

mechanism on the upwardly moving section of the bandsaw blade. An example of this is the patent to Noizet '892 (10). A second example of this is the patent to Ahrndt et al.'824 (84). It would have been obvious to one of ordinary skill in the art to have added a second pair of nozzles to Bleam's upwardly moving bandsaw blade section, as is well known and suggested by Noizet and Ahrndt, in order to better clean the blade.

6. Made of record but not relied on is a patent to Marckx showing plural nozzles directed at various portion of the band saw blade.

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ken Peterson at 571-272-4512, on Monday-Thursday, 7AM-5PM.
